

About OpenTundraTM

OpenTundra[™] provides solutions to our clients in the areas of inventory management, production management, and environmental compliance through a simple, centralized interface.

Open Tundra's[™] approach provides near real-time well information. Our solutions enable you to manage your wells by exception, paying attention to the ones that need it first. Pumpers can be more productive by managing sites with problems and focusing on preventative maintenance. Validate transfer tickets and immediately capture abnormal loss or theft.

OpenTundra's[™] clients have the information they need when and where they need it enabling timely and appropriate operational decisions.

Our People

Our people have decades of experience in process automation, enterprise wide resource planning and supply chain management. They hold patents for monitoring, gathering and communicating remote data from assets in explosive atmospheres. They have patents pending for automated real-time detection and notification of abnormal loss/theft.

Our Philosophy

OpenTundra's philosophy is centered on open platforms and collaborative partnerships with our clients and third party providers. This allows us to provide our clients seamlessly integrated solutions to their productivity challenges.
